

AIRBUS

AIRBUS POLAND S.A.

ENVIRONMENTAL POLICY

Being aware of the influence on natural environment, resulting from the activity conducted by AIRBUS POLAND S.A. we aim to limit this influence, recognizing it as the important element of functioning strategy and the enterprise development, assuring environment protection as well as applying the principle of sustainable development at undertaken activities.

Taking into consideration and respecting the value of natural environment we concentrate our actions on:

- implementation, maintenance and continuous improvement of Environmental Management System in accordance with the international standard ISO 14001,
- proceedings in accordance with the applicable legislative regulations and standards and others, and corporate regulations for environmental protection,
- conducting the rational waste management in order to minimize disturbance to environment and reducing the amount of waste,
- reducing the production and consumption of packages, and the use of reusable packaging,
- improving the quality and reducing the amount of liquid wastes,
- rational use of raw materials, fuel, energy and water,
- raising environmental awareness among all employees and engaging them to promote and apply the principles of environmental protection.

We realize our aims through:

- compliance with applicable laws and monitoring revisions,
- providing funds for investment in environmental protection,
- preferring the technology of minimum emission of harmful factors to environment,
- continuous improving of production process in order to raise continuously quality and productiveness, limiting influence of our activity on environment,
- minimizing the consumption of raw materials and medias to economically profitable level,
- introducing modern technical and organizational solutions for the purpose of limitation of probability of serious industrial failure occurrence, which may cause uncontrolled release of pollutants to environment,
- supervising companies and persons executing for us or in name of our company activities, within the area of our work center, which may have a significant, negative influence on the state of environment purity, in the scope conforming to our environmental management system.
